Elektrotehnički fakultet u Sarajevu
Odsjek - Računarstvo i informatika
Decembar, 2023

1. Funkcionalnosti

Dodane su funkcionalnosti:

- 1.1 Subscription** - funkcionalnost nudi korisniku mogućnost pregleda i uzimanja ponude pretplate na periodično slanje poklona na željene adrese. Postoje tri opcije iste: mjesečno, tromjesečno i šestomjesečno slanje. Nakon validnog popunjavanja podataka za dostavljanje i plaćanje, korisniku se prikazuje prozor s porukom zahvale.
- 1.2 Aktivne narudžbe** – funkcionalnost nudi korisniku mogućnost pregleda svojih aktivnih narudžbi, te otkazivanja istih. Ukoliko korisnik pokuša otkazati narudžbu čiji je datum isporuke u naredna tri dana od trenutka pokušaja, dobija poruku o nemogućnosti izvršavanja željenog zahtjeva. U suprotnom dobija poruku o uspješnom otkazivanju narudžbe.

2. Uloge i aktivnosti članova tima

2.1 Lejla Heleg

Pisanje testova za funkcionalnost *Subscription*:

- PrepareSubscriptionOrder_ReturnsViewResultWithCorrectData
- SubscriptionCreate_ValidMonthSubscription_ReturnsRedirectToThankYou
- SubscriptionCreate_ValidThreeMonthSubscription_ReturnsRedirectToThankYou
- SubscriptionCreate_ValidSixMonthSubscription_ReturnsRedirectToThankYou
- SubscriptionCreate_WhenUserIdIsNull_ThrowsArgumentNullException

2.2 Ilhan Hasičić

Implementacija metoda SubscriptionOrder i SubscriptionCreate.

2.3 Aida Zametica

Pisanje testova za funkcionalnost *Aktivne narudžbe*:

- ActiveOrders_WhenUserIsAuthenticated_ShouldReturnViewWithUserOrdersAndProducts
- CancelOrder_DeliveryDateTooClose_ShouldSetErrorMessageAndRedirectToActiveOrders
- CancelOrder_DeliveryDateCorrect_ShouldSetSuccessMessageAndRedirectToActiveOrders
- CancelOrder_OrderDoesNotExist_ShouldReturnNotFound
- CancelOrder_WhenUserIdIsNull_ThrowsArgumentNullException
- ProcessOrderCancellationAsync_ShouldCancelOrderAndAssociatedEntities
- GetUserOrders_ReturnsUserSpecificOrders

2.4 Vedran Mujić

Implementacija metoda ActiveOrders i CancelOrder.

2.5 Almedin Pašalić

Implementacija metoda GetUserOrders i ProcessOrderCancellationAsync.

3. Primjer toka primjene TDD pristupa

TDD second functionality #7

Task: Add new functionality "Active Orders"

Functionality Description: Active Orders is a tab that a registered user can access from the menu. By clicking on it, the user gains insight into all their orders that have not been delivered yet.

Additional functionalities:

- The user can review the products they have ordered for each completed order and can cancel the delivery if the delivery date is not within the next three days; otherwise, the delivery cannot be stopped.
- If the user attempts to cancel the order, they receive a warning.
- If the order cancellation is successful, the user is also notified.

Detailed tests are written in OrdersControllerTests, and the implementation should align with them.

...

I have a problem with the following methods in the OrderController:

ActiveOrders

CancelOrder

GetUserOrders

The issues are in the Assert lines and in the fact that OrderProducts should not be null.
